

OHR's Statement at the International Agencies' Joint Press Conference in Banja Luka

RS Government on Reform Must Improve

The Principal Deputy High Representative, Larry Butler, will hold a press conference within the next few days, on the RS Government's record of securing key reforms that will bring direct and desperately needed benefits to citizens.

This record is not good.

This is threatening the very real prospects that BiH now has of moving forward with the EU integration process, attracting investment, creating jobs and improving living standards.

BiH is entering a new era, and to deliver the benefits of that new era to citizens, the authorities must move forward, with a clear practical and political commitment, in order to secure the necessary reforms.

We will be issuing a media advisory later today with more details in due course.
