

OHR's Statement at the International Agencies' Joint Press Conference in Mostar

PBS Reform

The OHR is pleased that the PBS legislation has been returned to parliamentary procedures and we hope that the Parliament will act constructively and duly adopt the PBS laws. The European Commission has made it very clear that unless an agreement in line with the Feasibility Study is reached, BiH will not be able to obtain a SAA.

We believe that the interest of all people could be satisfied within one PBS system and we urge the parliamentarians not to put the BiH EU integration on stake and try to seek solution which would be acceptable to all, but which would meet the requirements outlined in the FS.
