CLAIM: Prospective defense property is to be handed over to the RS authorities.

FACT: State and defense property remain among the requirements outlined in the "5+2 Agenda." Therefore, the OHR remains engaged in reaching an acceptable and sustainable resolution of these issues.

When it comes to the immoveable military property that will serve future defense purposes (the "prospective defense property"), all legal acts needed to complete this objective are in place and such defense property locations must be directly registered under the ownership of the State of BiH. This is an urgent task for the newly elected authorities in BiH.

Regarding state property, the implementation of the Constitutional Court judgements is still pending. Resolving this issue requires enactment of state-level legislation by the BiH Parliamentary Assembly. The OHR continues to follow closely and plans to engage with all levels of authority on this issue after the governments are formed.
