Kenny resigned in '92 protesting against the US policy towards former BiH. Now, he is one of the best analysts of US foreign policy. He said that a new generation of journalists had found fertile soil in BiH for testing their media power and influence on the foreign policy of the western governments. They [journalists] were eager to report lies about Serbs, and their so called 'camps of death' without paying attention to what was happening in Croat and Muslim concentration camps. The West is not interested in ethnic cleansing and expulsions of Serbs, only information about some concentration camps and 'the brutal butchers' [the nickname for the Serbs] are circling the world. The summer of '92 was the turning point for the west to start hating everything that was Serb.
