## **TV BiH News Summary:**

TV BiH interview with Lagumdzija on recent Dayton Conference (03:37)

SDP BiH President Zlatko Lagumdzija, commenting on the <u>Dayton Agreement</u>'s 5th anniversary conference, said that for most of us this event should invoke a kind of collective sobering. "We must finally realise that BiH is not only not the centre of the world, but not the centre of the region any more either. In fact, BiH has become a side issue. In addition to removing the focus from BiH, the conference demonstrated that if we are not capable of moving forward independently, we would lose any chance for progress. We must act for ourselves because members of the international community will not help us improve the way we live. Their only reason for being here is to prevent us from fighting and dividing the country. They will not allow any one people to be dominated and they will not allow walls between us" said Lagumdzija. The SDP president continued by stating that OHR will have to use its authority in the near future because we Bosnians are currently unable to produce results ourselves; it is thus expected that OHR will act according to its mandate. Lagumdzija added that this situation is caused by weak political parties which continually fail to reach consensus.
