

Statement: HR/EUSR calls for adoption of Law on Information Society

The High Representative and EU Special Representative, Miroslav Lajčák, calls on the BiH House of Representatives to confirm its commitment to implementation of the requirements arising out of the eSEEurope Agenda for Information Society Development by adopting the Law on Agency for Development of Information Society as soon as possible.

The Law on Agency for Development of Information Society is a long overdue. It is a European Partnership and Feasibility Study requirement and its adoption will create a suitable environment for the accelerated development of BiH's information society.

By adopting this Law, the BiH Parliamentary Assembly will show their commitment to European integration and their determination to move forward on the EU agenda.
