

Local-Language Versions of OHR Web Page Launched

Reflecting the High Representative's commitment to making the OHR more accessible to the BiH public, local-language versions of the OHR Web Page (www.ohr.int) have gone on-line today.

The Office of the High Representative hopes that these new local-language versions will prove to be useful to citizens of Bosnia and Herzegovina and to all those who are interested in the well-being of this country, at home and abroad.

The local-language versions of the OHR Web Site were produced by the OHR Press Office and the Sarajevo-based software company, Quality Software Solutions, QSS.
