The author stresses that the reality on the ground shows that at the moment, a Police officer from the FBiH cannot operate in the RS and vice versa, let alone in Serbia and Montenegro. However, the author notes that things are moving forward, as demonstrated yesterday at Podgorica where Directors of Police forces from the region signed a joint statement on fight against crime. Tabucic</u> – "As you know, after the revelations contained in the reports published by the Special Auditor last year on the operations of public companies in BiH, the three prime ministers committed themselves to introducing speedy and effective reforms that would stop a small number of well-placed individuals stealing or misusing money that belongs to the people of BiH. One of these reforms is dealt with in the Entity Laws on Investment of Public Monies, which will ensure that all investments at every level of the government are only made according to clear and enforceable criteria. At the State level, investment of Public Monies is to be addressed by the new State Law on Finance," said OHR Spokesman Oleg Milisic at a press conference in Sarajevo on Tuesday. According to Milisic, this legislation requires that investments of public money by government departments can only be made by an investment manager, who must be authorized and identifiable. "There is nothing controversial in this legislation. It safeguards the people's money and protects the people's interests. The law has already been passed by the RSNA in first reading. However, it has not yet been presented by the Federation Finance Ministry to the Government. As long as this delay continues, the door to abuse remains open and the public suffer," emphasized Milisic. "OHR calls on Federation Finance Minister Dragan Vrankic to supervise the formulation by Ministry officials of a draft text of this law that can be presented without further delay to the Federation Government. The sooner this is done, the sooner the Government can send the law to parliament and the sooner parliament can enact the law. Only when this is done will citizens be protected," concludes Milisic.</p>
