<p>Children Embassy accuses Stevic, BiH MoD candidate, for murders</p>	<p>RTRS, FTV, BHTV 1, Dnevni Avaz pg 8 'Branko Stevic responsible for crimes against children in Bijeljina' – Secretary General of Children Embassy, Dusko Tomic sent letters of protest regarding the appointment of Branko Stevic for the position of BiH Defence Minister to High Representative, Paddy Ashdown, US Embassy and Speaker of BiH House of Representatives. Letter accuses Stevic for being responsible for murdering 22 Bosniaks, including 7 children from families Maglajlic, Sejmenovic and Sarajlic at the time of performing the duty of Chief of Bijeljina Police. Family Sarajlic, living in USA, confirmed in phone conversation to BHTV 1 that they have addressed this issue with the Children Embassy on this issue in 2001. Tomic explained that in 1992 Stevic talked to the members of families regarding the missing of their loved ones, when he allegedly told them that they were probably exchanged, though he knew that they were killed. Dusko Tomic also said that according to family Sarajlic, Stevic told them that it was best that they don't ask about them any more.</p> <p>FTV – Procedure of appointment of Branko Stevic as the BiH Minister of Defence should enter its official procedure on Monday, when the Chairman of Council of Ministers Adnan Terzic will conduct interviews with all candidates for the leading positions within the Ministry.</p>

<p>Stevic rejects accusations: there were no complaints vs. Bijeljina Police during my terms</p>	<p>Oslobodjenje cover, pg 2 'I am proud of myself, as both policeman and a person!', Dnevni Avaz pg 8 'Stevic: I did not job correctly', FTV, BHTV 1 – Branko Stevic, candidate for the BiH Defence Minister said that he expected OHR to agree with his appointment. He confirmed that he served two terms as the Chief of Bijeljina Police from September 1992 to February 1994, and again from 1996 to 1998, but added that he performed his duties professionally and has nothing to be ashamed of. "I am proud, I believe that I done my job honestly, I have recommendations and praises from both the citizens and institutions in charge, that is from the Biljeina municipality and I think that I truly worked well, as much as possible in that period. I believe that Police at the time was truly at the level of its assignment we worked according to the Laws, instructions and so on. We had same relation with all citizens, regardless of their political or some other affiliations, so that there were no complaints that Police in Bijeljina treats citizens differently, based on their political affiliations, ethical or any other", said Branko Stevic commenting on the accusations made against him by Children's Embassy.</p> <p>RTRS – Branko Stevic stated that Defence Ministry would function well only if all institutions and individuals show necessary level of responsibility. "When I accepted candidacy I was absolutely aware of enormous range of work that is before the Ministry. I am aware of overall responsibility. However, I think that work would be performed well if everybody shows certain level of responsibility and certain level of persevering", said Stevic.</p> <p>Nezavisne novine pg 3 'There were no complaints upon my work' – Branko Stevic, candidate for BiH Minister of Defence considers nomination as reward to his previous work. Dnevni List pg 2 'Explosions, murders...until when?' by Nevres Dedic –
Amid reports on frequent security incidents in BiH, particularly in Mostar and Sarajevo, the author says that Americans are perhaps used to murders as an every day routine, facilities getting blown up etc, noting that BiH only got that after the unfortunate war. Dedic concludes: "Foreigners will not help us much, because in a way, they favour the situation. If there were peace here, they would have to leave and lose cheap labour and the waste dump they were using. In this way, Mostar is certainly an unsafe city, whether the situation changes, it depends on us, whilst the foreigners say the security situation is not jeopardized".

<p>Trial of Jelavic, Prce and Rupcic</p>	<p>BHTV 1 – The first witness in the case of Herzegovina’s Bank affair should take the witness stand on Monday in case against Ante Jelavic, Miroslav Prce and Miroslav Rupcic. Judge Boland has worked over 20 years in US judiciary mostly in criminal cases. Judge didn’t want to discuss the case but he said that according to Law he was obligated to visit detention of three suspects, adding that conditions were not so bad. Commenting journalist’s remark that all three complained over conditions in detention, judge Boland said that he has no such information, but that they have right to complain because detentions are not good here, just as they are not good in USA.</p>

Education issues

<p>Beecroft: BiH could stay without 62 million dollars</p>	<p>FTV, BHTV1, Oslobodjenje cover splash, pg 7 'BiH is the country without vision and leadership', Dnevni Avaz pg 2 'BiH could lose 62 million dollars of a loan', Dnevni List pg 3 'BiH could stay without 62 million dollars', Onasa – BiH could lose 62 million dollars of credit if the law on higher education is not adopted by the end of March, stated Head of OSCE Mission to BiH Robert Beecroft in an interview with ONASA news agency. "The World Bank is prepared to allocate 62 million dollars, much of which will go to higher education and to primary and secondary education, but only providing that this law is through the parliament by the end of March," Ambassador Beecroft said. The BiH Council of Ministers is expected to discuss the draft law on higher education on Monday, after which it is expected to be forwarded to the parliamentary procedure. Beecroft said it would be tragic if considerations of politics and of micro-management cause the law not to be approved by the parliament over the next month and a half. He did not want to say whether there is certain resistance within the BiH Council of Ministers to this law, but added that "we have discussed this with the CoM at the number of levels and we are extremely hopeful that on Monday it will be blessed and moved on to the parliament." According to Beecroft, the law sets up a rational structure for funding. "Right now there is a mixed system – in the FBiH is different than in the RS, and it basically is not consistent with standard practice in Europe and it is wasteful," said Beecroft. The law proposes the higher education fund that will be established at the entity level, and the representatives of the higher education institutions will be required to participate in the work of the fund and in the decision-making process.</p>

<p>CoM today to discuss the Law on University Education</p>	<p>BHTV 1 – The Council of Ministers is expected to continue with their discussion on the Law on University Education on Monday, after the last session on the issue was interrupted. BiH Minister of Civil Affairs, Safet Halilovic said that solution is simple if political will exists and that this can be solved while implementing the reforms.</p> <p>Dnevni List front pg splash, pg 3 ‘Colak: Draft law on higher education anti-constitutional’ by <u>Miso Relota</u> – President of HDZ and BiH Security Minister, Barisa Colak, explains why he opposed the Draft law on higher education during the last session of the BiH Council of Ministers (NB: the session will resume today). “The law that is being proposed has a lot of anti-constitutional provisions that are in direct collision with the FBIH Constitution. The higher education in BiH is organized at level of entities. When it comes to the FBIH, the competence rests exclusively with the cantons. This law proposes something completely different i.e. the proposals in the law directly oppose the constitutional solutions, because the higher education is to go from the cantonal to the Federation level. As far as the RS is concerned, nothing changes there. Position of the HDZ BiH is that there needs to be a law on higher education at BiH level, which will incorporate everything that the Bologna declaration requires”, says Colak.</p>

RS is not a 'brake' for European integrations, because it completely fulfils DPA, conventions, charts and protocols by the Council of Europe, and it is only that in this way it can ensure credibility before IC that guaranteed constitutional structure of BiH, with two entities and three constitutive peoples. Also everybody needs to stay away from strong words, because strong words are dangerous in BiH."- said Mikerevic, and added that while Serbs hardly accepted Dayton today "they are its biggest protectors and implement it, while some representatives of other two constituent peoples are giving up on it." Mikerevic also stressed that everyone is in favour of reforms in interest of citizens of both entities. Regarding possible candidates for Vice President of SDS, Siljegovic says: "Candidate for Vice President of SDS will most probably be nominated from one of members of the Main Board who comes from the 6th constituency. They are Milenko Stanic, Milan Tupajic, Milorad Jankovic, Bosko Siljegovic, Miso Glogovac, Momir Tosic and Milos Jovanovic." Dnevni Avaz pg 4 'Kalinic and Cavic candidates for the president of the party?' – Following resignation of SDS Presidency, DA writes that it would not be surprising if Dragan Kalinic, current RSNA Speaker and SDS Vice President in resignation, nominates itself for the SDS President.</p>

BiH**

Vecernji List front ‘Bosnia and Herzegovina with twelve cantons’, pg 3 ‘Initiative on twelve cantons arrives to BiH’ by Zoran Kresic – Noting that there have been numerous initiatives aimed at restructuring of BiH, from ideas of “the third republic” to ideas on creation of the third entity, the author says the initiative that corresponds with reality the most is the one that advocates the “cantonization” of BiH. In this context, VL announces holding of the conference entitled “Bosnia and Herzegovina on the road towards functioning state – visions, perspectives, concepts” scheduled for today in Sarajevo. During the conference, one of principals of the European Stability Initiative (ESI), Gerald Knaus, will elaborate his vision of BiH organized in 12 cantons. <p>DA int with Edhem Biber on privatisation</p>	<p>Dnevni Avaz cover splash 'Revision being slowed down due to fear', pg 5 'FBiH Govt accelerates bankruptcies and is to dismiss thousands of workers' by <u>Enes Plecic</u> – In an interview to DA, President of BiH Syndicate Edhem Biber said that the Syndicate and FBiH Govt for months lead 'quite' war over two legal documents, changes to the Law on bankruptcy and the draft Law on Privatisation Revision. "[The FBiH Govt] accelerates bankruptcies in order to get rid of losses that authorities produced, revision has been slowed down probably because of the fear and inability to oppose to 'new elite', which for the little bit of money gained plenty of property, created by workers... Confrontation is necessary, though one, if these two laws, which are – I repeat – imperative for curing economy and society, fail to provide with the protection of workers while not creating the conditions for new employments", commented Biber. Asked whether FBiH Parliament tries to reconcile FBiH Government's and Syndicate's attitudes, Biber said: "It is obvious that some individuals in the Government still tries to protect its friends and cousins that brought dozens of companies through public offer of shares and through so called Markovic's privatisation."</p>

<p>FBiH Privatisation Agency's report on privatisation in FBiH</p>	<p>Dnevni Avaz pg 5 'State earned only 345 million KM' by <u>A. Out of that, 36.9 million KM were paid for the pensioners, while agencies for privatisation spent 21.6 million KM for their work. Report notes that the report contains a number of worrying information, referring to unspent 5 billion KM in certificates, and the very low respond from the foreign investors. Report reads that only 50 contracts were made with foreign buyers, which brought 250 million KM of profit for BiH. "The significant part of quality capital is still not in the position to be sold, such as the Aluminij, Elektroprivreda, Telecom or Tobacco Factory", reads the FBiH Privatisation Agency's report to which journalists comments: "For the information like this, it is not a wonder that none of the privatisation goals was achieved."</p>

The conclusions of the Board propose that one percent of net salaries of budget users and employees in public companies will be taken for the return. Council of Ministers were tasked to commence with activities regarding the collection of payments from Hydro Plant Bajina Basta for renting land of Srebrenica municipality. RTV subscription

**Collecting
of RTV
subscription
in the area
of Brcko
District**

Dnevni List Sun pg 3 'RTV subscription not being paid by cancelling phone lines' – Collecting RTV subscription in the area of Brcko District has, until now, been a specially defined item paid by citizens in a special way. The Brcko District Revenue Agency had assigned several persons that have been collecting RTV subscription in the area of Brcko District, as in accordance with a special Contract between PBS (Public Broadcasting Service) and Brcko District Revenue Agency. This month, RTV subscription amount was included to telephone bills issued by RS Telekom, while bills issued by HT Mostar or Telekom BiH did not include such item. The competent persons representing the telecommunication firms could not have given any specific details on this and only RS Telekom representatives have stated they have been acting as in accordance with the Contract signed between RS Telekom and PBS. The Brcko District Revenue Agency had not reacted upon the new way of collecting RTV subscription, hence the items included into telephone bills are being interpreted as double taxation. On the other hand, citizens living in the part of the Brcko District that had been a part of the Federation of BiH prior to the proclamation of the District are canceling their telephone lines because they are dissatisfied with the quantity of time dedicated to Brcko District in programs of the Fed TV or BHTV1.
