price
increases**

In regard to this, FBiH Government has established a Monitoring Team which should monitor all prices and passed decisions that should limit the margins to basic food products. On the other side, RS Government hasn't established this team, considering that this is a liberal market, which enables free establishment of prices and there is no need to do this. RS Chief Trading Inspector **Zdravko Milicevic** said that number of producers and distributors should enable the market to control the height of prices, stressing that he considers that there will be no drastic increase of prices.
