

OHR BiH TV News Summary, 1 December 1998

United Nations General Assembly accepted the Resolution on Bosnia and Herzegovina last night, proposed by 22 countries. The resolution confirms independence, territorial sovereignty and legal continuity of BiH within its internationally recognised borders, as well as independence of its three constituent nations. It is interesting that the part of the resolution regarding the events in former UN protected zone Srebrenica is not especially stressed in the world media. Presidency member Izetbegovic's advisor for the media, Jerkovic commented on this and said the part of resolution regarding investigation of circumstances under which the Srebrenica tragedy occurred is very important. Jerkovic said that the Article 16 of the resolution demands from the UN Secretary General to submit a complete report by September 1 1999, on events that occurred since establishment of the UN protected zone in Srebrenica.
