Silajdzic added that entities were still not accorded their constitutions within the BiH Constitution, although they were supposed to be within three months of the [DPA](#). regarding refugees, which was also partially judged as unconstitutional by OHR.

Reactions on the statements by Haselock and Bullivant – BiH TV reacted to Bullivant's statement, where he said that the coverage in the BiH TV central news last night criticised OHR proposals on the Law on Housing. Bullivant stressed that the coverage produced the wrong conclusions, badly researched the subject, and it could hardly be called journalism. It is about a strategy of frightening, and we saw one more time, how the BiH media, who are far from independent, are being used for misinforming the people of this country. The General editor of the informative programme made a public announcement: Dear Mr. Bullivant, we agree with you that there is only one interpretation of the [DPA](#). This is the High Representative's interpretation. Last night's broadcast was not aimed at the interpretation of the [DPA](#). Totally opposite from your claims, we aimed to stress the necessity of resolving the housing problems to the citizens of BiH. We are sorry that you interpreted the coverage the way you did. We would kindly inform you that this is only one of a series of broadcasts on this subject that we intend to make. We also want to ask you

finally to stop making heavy, groundless accusations against BiH editorial policy and permanently to keep in your mind that:

1. No one manipulates us.
2. We are not mis-informing the people of this country.
3. We are not frightening anybody, nor will we ever.
4. We offer the facts, and the public draw their own conclusions, just the way you did it.

– Dr. Ganic's Cabinet made a public announcement: I asked the High Representative to take responsibility for his spokesman, Haselock, because he tried to interpret my alleged statement without a personal insight into the statement I gave in Washington, and without contacting the cabinet who also has one. My recent statements about the protection of citizens' property and strict implementation of Annex 7 are well known, and therefore I refuse these set-ups, political hacking, and intrigues by Mr. Haselock, for whom I ask the High Representative to take responsibility.
