Dear Presidents,

The RS is again facing great temptations. The events follow one another, and we are not managing to consolidate our internal unity and stability. The behaviors regarding the special session of the National Assembly scheduled for today and tomorrow are very indicative. The internal schisms keep deepening. Parliamentary and other parties have started the electoral campaign and the struggle for prestige detrimental to the national and political unity and overall efficiency in the work. All of this, as well as other circumstances, favor the International Community to strengthen its pressure on the RS and to advocate more obviously the B&H unitarization, derogating the entities role and deviating from the genuine provisions of the DA. Due to all of this, the fear and concern are being increased...
