

# OHR's Statement at the International Agency's Joint Press Conference

Message to the political leaders of BiH from the High Representative:

"The next few hours and days will be crucial for the future of BiH.

The Peace Implementation Council of the International Community are gathering in Sarajevo over the next two days. They will assess whether BiH is moving seriously down the road of reform. In particular, they will be briefed on the progress – or lack of it – in the defence reform process, and will report back to Washington, Brussels, London, Paris, Berlin, Moscow and the other capitals of the PIC countries.

But it is more than just BiH's credibility that is at stake.

If you, the leaders of BiH, accepts the the Defence Reform Commission's proposals, you will open the door to BiH becoming a credible candidate for NATO's PfP. If you rejects these reform proposals, you will set this country back maybe for many years. The choice is yours. I cannot do this for you. BiH cannot get to NATO or Europe through the Office of the High Rep.

Let me repeat: it would be a tragedy for BiH if it rejected this historic opportunity to join NATO's PfP. I passionately believe membership of first PfP and then NATO offers the best possible chance of lasting peace and security for the citizens of this country. It is no exaggeration to say that the future of the children of Bosnia and Herzegovina depend on the

decisions you will take in the coming hours and days.

You may have concerns about the proposals. You may want further clarification. In which case, let the Commission complete its work so these proposals can be considered in the democratic institutions of this country, in government and in parliament. If you have concerns, my message is this: Trust the Democratic Process. Give Parliament a chance.

So let me end by appealing to all of you: consider what is at stake; consider the price that BiH will pay if you fail to back reform; and make the right choice, in the interests of BiH, and in the interests of all her citizens."
