

OHR's Statement at the International Agency's Joint Press Conference

Monthly Economic newsletter

I have brought along copies of OHR's latest monthly economic report. As you know, this report brings together monthly figures that offer a snapshot of the BiH economy.

This month's report shows that BiH's currency sector continues to do well with continued confidence in the KM. The report also shows that interest rates continue to decline every month.

However, the trade figures continue to run at a deficit – imports into BiH are still higher than the exports, despite a slight growth in exports.

I have brought along copies of this report with me, those of you interested will also find this report on the OHR web page at www.ohr.int.
